

SPST Momentary Contact Switch
 12 V 50 mA
 100,000 clicks

ASIN: B09R47N37H

TS-D001

How does tactile switch work :

Pins 1 & 2 are always connected, as are Pins 3 & 4. However, Pins 1 & 2 are isolated from Pins 3 & 4. When the button is pressed the two sides are linked and Pins 1, 2, 3 & 4 are all connected.
